PROFESSIONAL SUMMARY

I've spent 13+ years helping brands figure out what they stand for and then building the strategies, stories, and systems to bring it to life. My sweet spot is translating complex ideas into marketing that actually moves people, whether that's a product launch, a lifecycle program, or a full brand repositioning. Where I shine is at the intersection of strategy and execution, partnering with cross-functional teams to turn big ambitions into measurable results across global markets.
